2011
Best Redevelopment Project

Reaching new heights in redevelopment

The Los Angeles Business Journal has awarded AT&T Center the prestigious 2011 Best Redevelopment Project.

The redevelopment resulted in a new Gensler-designed facade creating a more contemporary look while reducing the building's energy consumption. This LEED Gold Certified building also boasts of newly enhanced granite and terrazzo lobbies, a Market Café operated by the highly acclaimed Patina Restaurant Group along with lush gardens that provide a vibrant environment for all to enjoy. The new crown offers two full floors of the most dramatic office space in all of Los Angeles. Fully enclosed by floor-to-ceiling glass, the views are unparalleled, from LA Live and STAPLES Center to Hollywood and the Pacific Ocean.
